

1. UI Wireframes

Landing Page :-

The wireframe illustrates a web page structure for a Vendor Reliability Platform. It features a top navigation bar with links for Home, Features, Workflow, Contact, Login, and Register. The main content area includes a hero section with the title "Vendor Reliability Platform", a subtitle "Improve Vendor Performance with Intelligent Procurement", and two buttons: "[Get Started]" and "[Learn More]". Below this is a section for a "Dashboard Illustration". The footer contains a navigation path: "Register -> Login -> Dashboard -> Manage Vendors -> Reports" and a "Footer" label. The design uses a light gray background with blue dashed lines for borders and text for content.
